Subject: Drop the Microsoft case

I believe the Justice Dept. should make the Microsoft case disappear. We are all free to choose our computer items. Let it be a thing of the past. There is so many terrible things that are going on, so look to the future.

For one, the environmental groups, Sierra, Friends, Greens, etc are all trying to take over the plant, it is time to investigate their expensive offices and things they use their money for. I sort of believe they are UN-American.
